Got half of info scanned- just got to get away from
work long enough to finish and send it- next day or two.
You can receive large files on email?

Meyer: Did you try a Google search for "ARC-5" ? Some time back I got an entire manual for both TX and RX off the web. Unfortunately the URL didn't print on top of the pages so I can't tell you what it was, but it's out there in web-land.

Want to buy:

MD-7/ARC-5 plate modulator from WW 2. This was intended to be used with the famous ARC-5 "command" xmtrs.

Prefer in unused condition but used condition is

acceptable if the rig is good to excellent. No evidence of abuse such as dents, etc. Poor finish is acceptable.

Should have all tubes but missing dynamotor okay.

The only acceptable mod. is: Heaters rewired for 12.6 volts.

Tel: (478)741-1710 anytime.

73,

Meyer Gottesman, W6GIV
Macon, GA

Sure sounds like Ocean State to me. I placed my first order to them in October, got an email confirmation, and never received the parts. Only on inquiring directly was I told that the FT-240 cores were on backorder, "expected early November". I waited until mid-November, called (toll call, 800 number only for placing orders), and the

salesman assured me they had come in that day and my order was being shipped that afternoon.

Naturally, nothing showed up. I gave up and got the parts elsewhere. I called last week to tell them to officially cancel the order and their response (same brusque guy with New England accent) was that "our computers don't go that far back" so it was automatically canceled (!)

Guess which hot place will be very cold before I try to order from them again. So much for increasing the customer base...

Although Ocean State is famous for exceedingly slow service and generally ignoring customer inquiries, Leeds is the winner when it comes to rude "service".

If you're looking to be treated with the same respect you'd get from a NYC cabbie, deal with Leeds.

John K5MO

PS: Apologies to NYC cabbies, for lumping them in with Leeds.

Hello Everyone,

I am working on a new web document and the use of ink tape recorders to copy CW has been identified.

Does anyone have a photo that they could scan of any of the following:

- Mechanitron ink tape recorder
- McElroy ink tape recorder.
- Marconi dual-pen ink tape recorder

I guess I have a protective angel because Leed's has given me excellent service every time I have ordered from them. They just shipped me the "9 pin octal" plug and back shell I needed for connecting my Ranger to the Desk KW; ordered on Monday and parts were here in IL on Thursday. All of my orders have been promptly and accurately filled. Maybe if I went there in person I could get the "New York" experience.

For the 12 volt 6F6:
The type 18 is same as 6F6 but has 14v 0.3amp filament. Don't have
any idea where you could get one thought.

There is a 12V6. I have seen these in the old 12volt car radios. I
can't find it listed in tube books, but I know they exist

Went to Nortex Electronics in Fort Worth yesterday.
Looks like he brought in an estate.
He has some radios for sale if anyone is interested:
Skyrider Defiant (\$275), Sky Champion (\$165), NC155 (\$165), KT-200 (\$145),
as well as an NCX3 w/speaker (\$195).
If anyone is interested, they can call 817-731-6611.
He is closed on Monday.
That Skyrider Defiant looks really nice.
Almost brought it home for myself.
Did get an ICM fc-2 converter which has been protected through the years by
a thick layer of dust.

Roger, someone once told me to "ask him about all those boxes."
I never did. What is the story on all those boxes of stuff?
Is he ever going to go through them?
I keep waiting for the day some careless doofuss drops a
cigarette in there.... WHOOSH!

Lewis is at least 80 now, so this won't go on for much longer.
He seems to have more stuff in the main warehouse every time I get over there, about monthly.
The only boxes I see are those piled in the aisles, and anyone is welcome to open them up and ask price.
For those wondering who it is we are talking about, here is a link:
<http://www.montagar.com/~patj/nortex.htm>
Last month I snagged a studio microphone needing some parts.
The more you dig in there, the more interesting things you turn up.
Go for it.

Hello All,

I have a 2 meter tube-type handheld made by Sperti Inc. of Cincinnati Ohio. It is model XR-2-B.S. I think it was made about 1948.
I think it was made for the Boy Scouts. Can anyone verify this?

Content-Transfer-Encoding: 8bit

Here are a some items for sale. Prices do not include shipping. I will ship overseas.

Hewlett Packard HP 331A Distortion Analyzer.....\$100 plus shipping

Clean working unit. No power cord.

<http://members.cox.net/radiostuff9/hp331a.JPG>

<http://members.cox.net/radiostuff9/hp331a2.JPG>

<http://members.cox.net/radiostuff9/hp331a3.JPG>

General Electric TC-1 1930's Tube Tester.....\$75 plus shipping

Neat art deco looking unit from late 1930's. It tests tubes from the 1920's to beyond the 1930's as it has some updated tube charts. It will test 6L6's, 6V6's, etc. It will test octal, 4, 5, 6 and 7 pin tubes. It will not test any miniature tubes. The unit works great. The front panel and case are in excellent shape. It includes instructions and tube charts.

http://members.cox.net/radiostuff9/ge_tc12.jpg

http://members.cox.net/radiostuff9/ge_tc1.jpg

http://members.cox.net/radiostuff9/ge_tc13.jpg

Digital Precision 2440 Nixie Tube DVM.....\$40 plus shipping

This unit will measure DC and AC voltage, and Resistance. This unit has been tested and works. It does not include a power cord.

<http://members.cox.net/radiostuff9/dp2440.jpg>

<http://members.cox.net/radiostuff9/dp24402.jpg>

Accurate Instruments Model 158 Transistor Radio Tester.....\$60 plus shipping

This unit is a Transistor Tester, Signal Generator good up to 30 MHz and Signal Tracer. The transistor tester portion will test both leakage and gain of NPN and PNP transistors reading quality on the meter. The combination of these three can be used singly or in combination for repairing or restoring vintage transistor radios. This unit works and is in excellent condition. It includes the test leads and the original manual.

http://members.cox.net/radiostuff9/xstr-radio_tester.JPG

http://members.cox.net/radiostuff9/xstr-radio_tester3.JPG

Batch of W.W.II Crystals.....\$40 plus shipping
39 Crystals. See photo for frequencies. Here is a link to the frequency
conversion chart http://members.cox.net/n7rk/ft241_xtal_list.jpg
http://members.cox.net/radiostuff9/xtal_batch.jpg
http://members.cox.net/radiostuff9/xtal_batch2.jpg

Hewlett Packard HP 410C Voltmeter - Parts or Fix It....\$20 plus shipping
Not working. It does not include a power cord or RF probe.
<http://members.cox.net/radiodx3/hp410.jpg>
<http://members.cox.net/radiodx3/hp4102.jpg>

Vintage Westinghouse Portable DC Voltmeter.....\$35 plus shipping
This meter in a heavy bakelite measures 0-150 volts and the ranges are
changed by making the appropriate connections to the meter. The ranges
are: 1, 5, 15 and 150 volts. This is a working unit in nice condition.
The instruction card on the inside cover has a date of 1942.
http://members.cox.net/radiostuff9/west_meter2.jpg

Bud - Neutralizing Transmitting Capacitor.....\$25 plus shipping
I have two of these.
<http://members.cox.net/radiostuff9/neutrcap.JPG>
<http://members.cox.net/radiostuff9/neutrcap2.JPG>

485 pF Precision Variable Capacitor with Gear Drive.....\$20 plus shipping
Measures 15 pF min and 485 pf max. This capacitor is in excellent
condition. Nice capacitor for a receiver or a home-brew VFO project.
<http://members.cox.net/radiostuff9/verniercap.JPG>

Unknown Microphone #1.....\$20 plus shipping
Neat Brushed aluminum housing. Manufacturer is unknown. Needs a new
cartridge which you can probably get from Radio Shack to work.
<http://members.cox.net/radiostuff9/weirdmike.jpg>

Unknown Microphone #2.....\$25 plus shipping
Manufacturer is unknown. This does work and was hooked to a Ranger I
when I got it. I saw picture of this mike in one of K2TQN's columns in QST
http://members.cox.net/radiostuff9/odd_mike3.jpg

Philips 4-65A tube with Ceramic Socket.....\$35 plus shipping
Build something! I did check the filament for continuity and it is OK.
No other way to test. The beige background makes the tube
appear burned which it is not!
http://members.cox.net/radiodx3/amp_465a.jpg
http://members.cox.net/radiodx3/amp_465asocket.jpg

Thanks for looking.

Tom;

I have a pair of these also. On the front of each is a decal with the official Boy Scout logo. That and "B.S." in the model number are the only confirmation I could ever find that these radios were part of scouting. A couple of years ago a list member made me a copy of the directions. These directions don't even list the model number. If you send me your address I can make you a copy. Each unit requires a pair of 67 volt batteries.

It would be neat to perform a short test and see what the range of these units would be.

Yes.
Most aisles are blocked with stuff on the floor taking up about half the
aisle width.
If you want to get to the other end of an aisle occupied by someone, you
can't pass, but have to go around using another aisle.
It is really a sight to see.
73
Roger

Well, it *is* full of "stuff."
And I like Lewis very much.
Trouble is, his stuff's been picked over by the best.
He's got this huge shelf of transformers that looks great.
But there aren't any in there of particular interest.
All the "cherries" are long gone.
You might find the occasional goodie, but.....
Perhaps I need to spend some time with those boxes?

I used to think that, until I started really digging.
I recently found a 970 volt ct 950 ma power transformer in that back shelf
area for a kw ssb amp.
It must have been there for years, I just never saw it before.
You have to spend some time and look.

Yes it is a very fascinating place. Since Lewis is 80, I do hope that he is smart enough to will this to someone who can dispose of all this hidden gold to people of this great hobby. As we all know, no future planning means it will end up as scrap metal or in a landfill. To keep these unique pieces of history alive, now is the time to make arrangements to where your pieces are going to end up when our time is up.
